PREFACE

When the *List of Serials in Public Libraries of Chicago and Evanston* was published by the Chicago Library Club in 1901 the statement was made that The John Crerar Library proposed, if it proved to be of real service, to issue cumulative supplements. The present volume is the second of these supplements. The justification of its publication would seem to be ample, because of the proved usefulness of the original, not only for the purpose for which it was compiled, in giving information where a given volume of a serial can be consulted most conveniently, but also, and somewhat unexpectedly, as a convenience in the administration of the libraries. The inclusion of three new libraries and very considerable special purchases made by two of those already represented, have increased this second edition to such an extent that it is now larger than the original list and contains nearly as many new titles as were given in that publication. While this unexpected increase has delayed the preparation and made it more laborious, yet it also demonstrates the necessity of frequent revision to secure even approximately all the usefulness possible for the work. It is hoped that this is not slight, notwithstanding the imperfections almost inevitable in co-operative work, and certainly inevitable under the conditions of editing in this case.

The present edition contains the holdings, all corrected to June, and the five largest to November, of nineteen libraries of Chicago and Evanston. Three—the Chicago Law Institute (Lw.), the Northwestern University Law School (Nwl.); and the University of Illinois School of Pharmacy (P.)—have not been represented before. Each adds a number of titles not in any other; the sets of session laws and court reports of the first and the foreign legal journals of the second being especially remarkable. Besides these, The Newberry Library, by its purchase of the Bonaparte collection on philology, and The John Crerar Library, by its purchase of the Gerritsen collection on political science and political economy, have made wholly unusual contributions. Hardly one of the libraries, however, has failed to report a number of new titles, considerable in proportion to its previous holdings. That this increase in serials is only part of a general increase in the library resources of the city, is shown by the fact that the fifteen libraries represented in the original list, which reported in 1901 a total of 1,003,000 volumes on their shelves, now report a total of 1,318,500. The four libraries not in the original list add 199,500, making the total number of volumes on the shelves of the nineteen libraries in 1905 1,518,000.

This volume should be consulted first in all cases, even when reference to the desired title from an older form or from the society publishing it, or to the desired society from a place, is found only in the original list. For reprinted titles all the entries have been reprinted, so that it is unnecessary to consult the original for a title in the supplement. On the other hand, no titles have been reprinted except to give additional information or to correct errors of some importance, so that the entries for one publication of a society may be found in the supplement and for another in the original list. The only exceptions are the United States Government, the State of Illinois, and the City of Chicago, for which all titles have been reprinted from the original list, whether altered or not.

The supplement, like the original list, is intended to include all serials not purely administrative, of which a library has (1) five volumes or years in sequence; (2) one-half of the set if less than ten volumes or years; (3) the first or last volume if not in any other library. There have been included, also, though somewhat incompletely, all state docu-

PREFACE

ments and the publications of all Chicago societies and institutions, whether administrative or not.

One change in the method of entry has been made by unanimous consent of the larger libraries. The entry of foreign serials having individual titles under the society has proved so inconvenient that such serials are now entered under the title, in accordance with the rule for American and English publications. Reference has been made from the societies in all cases where their agency is known. References are made also from the place of location of a society to the name of the society, unless the reference occurs in the original list.

The changes in form of entry are very few. One or two minor changes have been made to secure greater clearness, and the capitalization has been altered to agree with the practice of The John Crerar Library. The alphabetical arrangement of foreign and English compound words has been made uniform.

There are in the supplement entries for some 8,460 serials and 1,310 references. Of the 8,460 serials, 5,240, or 62 per cent, are received currently, as against 57 per cent in the original list; 2,810, or 33 per cent, as against 36 per cent, are in languages other than English; 4,880, or 58 per cent, as against 65 per cent, occur in one library only; 1,790, or 21 per cent, as against 18 per cent, occur in two libraries only; 810, or 10 per cent, as against 9 per cent, are in three; 980, or 11 per cent, as against 8 per cent, are in four or more. The increased percentage of the last class, and the consequent diminution in the percentage of those found in one library only, are easily explained by the inclusion of state documents, which are received as gifts. Making due allowance for this, and taking into account the small diminution in the percentage of foreign titles, it would seem that the libraries of the city are maintaining their policy of discrimination and division of the field, and the standard of their acquisitions. Of the 8,460 entries, 2,020 are unaltered from the first edition of the Supplement, 2,020 are corrected entries from it, 1,270 are corrected entries from the original list, and 3,150 are new. The original list still contains 3,540 entries not reprinted, so that the total number of serials recorded is 12,000.

The thanks of The John Crerar Library are due to the authorities of the libraries represented for their cordial co-operation. The Editor desires to express personally his grateful thanks to his colleagues and their assistants, and also to the members of his own staff, for the care taken in the preparation of the contributions from the various libraries, and for their patience in answering his many questions. All have given the matter much attention, but to Mr. W. S. Merrill of The Newberry Library he is especially indebted for a general revision of the work, which has corrected many errors and cleared away many difficulties. The officials of the Library of the University of Chicago desire him to express their regret that circumstances prevented the revision of their entries from being as thorough as they wished it to be.

THE JOHN CRERAR LIBRARY

A BIBLIOGRAPHY OF UNION LISTS OF SERIALS

BY
AKSEL G. S. JOSEPHSON
CATALOGUER

SECOND EDITION

CHICAGO
PRINTED BY ORDER OF THE BOARD OF DIRECTORS
1906

The first edition of this bibliography accompanied a paper by the Librarian of this Library on *Co-operative Lists of Periodicals and Transactions of Societies*, read before the American Library Association at the Atlanta Conference in 1899, and was printed in its proceedings. It was afterwards reprinted, with some additional titles, in fifty copies, for private distribution. The first edition was known to be incomplete, though not to the extent that it contained only about one-half of the union lists then in existence; it contained twenty-five titles, while twenty-three lists issued previous to the year 1899 have since come to the compiler's notice, and at least seventeen new lists have been published in the last six years. The compiler does not dare to claim that even this new edition is complete, notwithstanding his diligent efforts to make it so. In the first edition, the titles were arranged chronologically; a geographical arrangement, by countries and cities, with a chronological table and an alphabetical index of cities, has now been chosen; it is hoped that this change, together with the descriptive notes, may increase the usefulness of the list.

The majority of the entries have been made from copies in The John Crerar Library, though the resources of The Newberry Library and the Chicago Public Library have also been drawn upon. Thanks are due to the Library of Congress and the New York State Library for the loan of books; to officials of the Cornell University Library, of the Harvard University Library, and of the Library of Congress, for information and assistance.
